

## Commercial Cargo

For Reed: what issues and challenges did you deal with winning NASA approval to reuse a Dragon capsule?

After losing 2 CRS missions how critical is mission success for the cargo yet to fly?  
How much margin was built in to CRS2?

How are experiments removed from the pressurized part of the Dragon and from the unpressurized trunk?

How much is required to migrate Dream Chaser among launch vehicles?

What are your plans for advertising your vehicles and capabilities to the mass market?

How many ports are available at ISS? Is there any vision of augmenting those before the end of ISS?

Dream Chaser looks different and new. What's its history?

If Mark doesn't mention it: any more details on UN buy of flight?

Mark, will CASIS manifest on your vehicle?

How many times can a Dragon capsule be reused?

Benji what do you do to help the pay loader have a good integration experience?  
Are they treated like farm animals and put out in a barn?
