

Work Teams

How is diversity of age managed?

If you were making a non-engineering hire in the space business (say sales or marketing) where would you market the position?

Thank you for having a diversity panel which includes male panelists/ perspectives

Mr. Young, how do you recruit from colleges which are not on the top school lists which you described?

Jonathan Firth: do you foresee Virgin Galactic moving from single point sub orbital operations to international transportation?

Frequent mention of STEM but never STEM. Seems like including ARTISTS would pull on more women and more out-of-box creative minds.

How do you manage with an employee's "Personal expression"?

I noticed that you had mentioned moving financial experts to launch operations. Do you have a success story where this particular diversity proved invaluable?

Are your companies supported financially by any agency to search for diversity?
How?

Young men are increasingly absent from undergraduate classrooms. Are we looking for solutions to this problem, too?

Thank you for having a diversity discussion with male perspectives/participants. Do they try to help male employees identify their own biases?
